

Release notes

ArcGIS 10.9.1

In this topic

1. [10.9.1 Security and Required Update](#)
2. [10.9.1 Log4j Update](#)
3. [10.9.1 Help Language Pack Update](#)
4. [10.9.1 Software Release](#)

The bugs that were fixed in the 10.9.1 release of ArcGIS Enterprise on Kubernetes and subsequent updates are described below.

10.9.1 Security and Required Update

The list of issues addressed describes bugs that were reported to Esri Technical Support and fixed in the ArcGIS Enterprise 10.9.1 on Kubernetes Security and [Required Update](#). The version tag for this release is 10.9.1.1612.

Bug	Synopsis
BUG-000149597	Stored XSS vulnerability in ArcGIS Enterprise.
BUG-000150625	When applying an upgrade to a new software release, include all available updates automatically.
BUG-000150626	Support a unified ArcGIS Enterprise on Kubernetes license during upgrades.
BUG-000150628	Provide flexibility to support alternative or replacement persistent volumes during upgrades.
BUG-000150629	When the option to upgrade to a new software release is available, provide a summary of new features and system requirements.
BUG-000150630	Provide a status message in cases when the upgrade cannot continue, for example, when the network connectivity is unavailable.

Bug	Synopsis
BUG-000150631	Provide a status message in cases when the upgrade cannot continue, for example, when the container registry cannot be accessed.

10.9.1 Log4j Update

The list of issues addressed describes bugs that were reported to Esri Technical Support and fixed in the ArcGIS Enterprise 10.9.1 on Kubernetes Log4j Update. The version tag for this release is 10.9.1.1611.

Bug	Synopsis
BUG-000147856	Update Log4j to address security vulnerabilities.

10.9.1 Help Language Pack Update

The list of issues addressed describes bugs that were reported to Esri Technical Support and fixed in the ArcGIS Enterprise 10.9.1 on Kubernetes Help Language Pack Update. The version tag for this release is 10.9.1.1610.

Bug	Synopsis
BUG-000145916	Provide final documentation for all supported languages in ArcGIS Enterprise 10.9.1 on Kubernetes.

10.9.1 Software Release

The list of issues addressed describes bugs that were reported to Esri Technical Support and fixed in the ArcGIS Enterprise 10.9.1 on Kubernetes software release. The version tag for this release is 10.9.1.1599.

Bug	Synopsis
BUG-000144762	The 10.9 backup and restore documentation describing how to configure storage using the ArcGIS Enterprise Administrator API is missing closing curly brackets in both JSON examples.
BUG-000144765	When specifying a nonexistent TLS secret in the deploy.properties file, the deployment continues and completes without validation or error.
BUG-000144768	The organization fails to configure when a TLS certificate with a PKCS1-formatted private key is specified during deployment.
BUG-000141185	The ArcGIS REST Services Directory requires a login to view services that have been shared with everyone.
BUG-000144770	When ArcGIS Enterprise has been configured with a forward proxy, the organization's print service fails to print.

Bug	Synopsis
BUG-000144771	If a storage class name is not specified when using the setup wizard to create an organization, the organization fails to configure.
BUG-000144772	When assigning ArcGIS Pro or other add-on licenses from the organization's licenses tab, the member names are not returned.
BUG-000144773	After importing an updated server license, the system-managed relational data stores are not updated with the new license expiration date.
BUG-000144775	The documentation contains an erroneous description and JSON example for the Overview API's Update operation.
BUG-000139951	The ArcGIS Enterprise Administrator API pod is unable to start when the primary relational data store service is inaccessible during startup.
BUG-000144776	After running the CleanGPJobs task, some geoprocessing job-related data items remain.
BUG-000144777	When an attempt to register a user-managed data store fails, a misleading error message is returned.
BUG-000144779	The View In ArcGIS Online Map Viewer link from ArcGIS REST Services Directory is incorrectly concatenated and fails to render the map.
BUG-000144780	After successfully creating an organization, several severe log messages are returned and indicate a server output directory does not exist.
BUG-000144781	After updating administrative credentials for the metrics viewer app using ArcGIS Enterprise Administrator API, the new credentials are not stored and cannot be used to sign in.
BUG-000144782	Provide finer-grained warning messages to indicate whether an error occurred while creating an organization.
BUG-000144783	If a request is made to a GIS service endpoint while it is publishing or starting, the request will fail.
BUG-000144784	When system and utility services are running, several INFO-level messages are logged unnecessarily and cause the logs to fill up.

Bug	Synopsis
BUG-000144785	The apply edits operation fails for service- or layer-level edits when async=true.
BUG-000144786	While restoring a backup, the ingress service is also re-created, causing a mismatch in the DNS configuration.

Additional issues have been addressed in ArcGIS Enterprise 10.9.1 on Windows and Linux. Many of these also apply to ArcGIS Enterprise on Kubernetes, such as those pertaining to ArcGIS Server or ArcGIS Enterprise portal. See the [issues addressed list](#) for details.
